

COMMUNICATION

Sovereign video conferencing

Your online meetings, on your own infrastructure.

Your online meetings, on your own infrastructure.

Client appointments, team meetings, demos: video calls are now part of every day. The Video Conferencing module builds them right into the tool, on your own dedicated server, with no third-party account. Meetings are linked to appointments and client files.

No third-party accounts

Your clients join with a simple link, nothing to install.

Data under your control

Streams and recordings hosted on your dedicated infrastructure.

Everything connected

Each meeting linked to its appointment and its client.

Meeting minutes

Recording and transcription available.

In this module

- 1 Meetings linked to appointments
- 2 Waiting room
- 3 A complete meeting
- 4 Recording and transcription
- 5 Dedicated infrastructure

1

Meetings linked to appointments

The link is ready the moment it's booked.

Every video appointment generates its own room and link, sent to the client automatically. One-off meetings are created in one click from a record or a conversation.

What it enables

- Room created at booking
- Link sent automatically
- One-off meetings in one click
- History per client

2 Waiting room

You decide who comes in.

Participants wait in a waiting room that carries your branding until you let them in. A prospect can even wait for an instant call from their personal link.

What it enables

- Branded waiting room
- Admission by the host
- Instant call from a prospect link
- Nothing to install for guests

3 A complete meeting

Everything you need, nothing you don't.

Video, audio, screen sharing and chat, right in the browser. Meetings stay light and stable, even with several participants.

What it enables

- Screen sharing
- Chat
- Multiple participants
- Runs in the browser

4 Recording and transcription

Find out what was said.

Meetings can be recorded with participants' consent, then transcribed. The minutes are attached to the appointment and the client file.

What it enables

- On-demand recording
- Automatic transcription
- Minutes in the client file
- Configurable retention

5 Dedicated infrastructure

Privacy by design.

Video conferencing runs on your own dedicated server, separate from the rest of the tool. No account with a video provider needed, and no per-participant subscription.

What it enables

- Dedicated video server
- No third-party account
- Encrypted communications
- Monitoring included

TAILORED

Adapted to your business

Waiting room, branding in your company colours, recording retention period, authorised participants: video calls follow **your** privacy rules and **your** way of welcoming clients.

This module never arrives alone

We install it, tune it to your rules and train your teams. And when part of your trade fits no box, we build it.

01

A workshop per profile

At least an hour with every job concerned, to set the screens against real working days.

02

The missing module

A need nobody covers becomes a real module, designed for you and maintained like the rest.

03

Tuning as you go

One more field, one less step, an automation: the tool is adjusted while you use it.

CONNECTORS

Available integrations

Compatible with the tools you already use:

Calendar

Google Calendar

Outlook / Microsoft 365

ICS

Transcription

Speechmatics

OpenAI

Mistral

Connectable alternatives

Microsoft Teams

Google Meet

Zoom

Non-exhaustive list: other tools can be connected to suit your needs.

Works with

crm.agenda Calendar & appointments

crm.portal Client portal

comms.chat Team chat & real time

auto.ai Built-in AI

crm.leads Prospecting & lead capture

Let's talk about your future tool

Tailored demo, by appointment.
